

EM Fact Sheet

Ogden Air Logistics Center Environmental Management Directorate 7274 Wardleigh Road Hill AFB, Utah 84056-5137 Dave.friese@hill.af.mil 775-2325

Recycling at Hill AFB

Purpose: This Fact Sheet is to inform employees of the recycling opportunities at Hill AFB, and

promote recycling in work areas.

Mission: The mission of the Hill AFB Recycling

Program is to reduce solid waste discarded in landfills, prevent pollution, conserve natural resources, and generate revenues for the

Services Division. We are recognized as a leader in recycling in the Department of Defense, having won the General Thomas D. White Awards for Pollution Prevention and Recycling. There are many materials in our industrial areas, shops, offices, and homes that are being or can be recycled. Please use this Fact Sheet to enhance your personal understanding of and commitment to waste reduction and recycling.

Meet the Team & Go on a Tour:

- "Wizard of Waste" Recycling Office: Bldg 805, 777-9007
- Solid Waste Action Team (SWAT): 775-325
- Compost Operations: Come get some great **Garden Compost** (for on-base use only) an excellent soil amendment for flower beds and gardens! West area next to Horse Stables, 775-2325
- Wood Waste & Pallet Recycling: 775-2325
- Refuse Collection, Contract, Quality Assurance Evaluator: 777-2927
- Davis County Energy Recovery Facility & Landfill: 1256 E Hwy 193, 771-1434.

Program Assistance (call 777-9007):

We can provide help in starting a program, or improving a program.

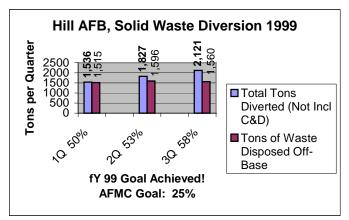

Here's some of the more popular topics.

- Organizing a recycling committee
- Selecting what materials to recycle
- Waste reduction audits
- How to effectively collect recyclables
- What kind of collection containers to use
- Program education & promotion
- Buying recycled content products to save resources and increase the demand for recyclable materials

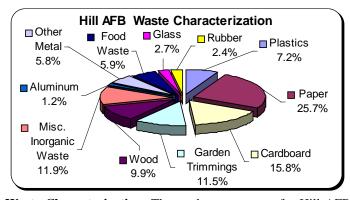

Look for RECYCLING on the Hill AFB Web Page: http://www.hill.af.mil/.

Find more on what, where, & how to recycle.

Performance Indicators: We have exceeded the AFMC goal for Solid Waste Diversion. Yet there is still lots of recoverable material going into the dumpsters. We are paying \$75 per ton to dispose of solid waste at the Davis County Energy Recovery Facility where it is burned then landfilled. Fees have been as high as \$110 per ton. Recycling and Compost operations divert waste from disposal and thus allow us to avoid the high costs of disposal. We do get some revenue from recycling operations but it is a small amount compared to the amount saved through avoided disposal fees. (Construction & Demolition (C&D) waste is included in these figures. We do have a separate C&D recycling program.)

Waste Characterization: The total waste stream for Hill AFB was analyzed in order to target recyclable materials. Note that Paper, Cardboard, Garden Trimmings, and Wood make up well over 50% of the waste we produce. There is a potential to recover much more than we have been doing. Please make a special effort to recycle more of these items.

See Attached "Where to Recycle" Table

Building 805 is the Recycle Center for most materials See RECYCLING on the Hill AFB Web Page www.hill.af.mil Items locally acceptable for recycling are those which are feasibly marketable. As markets change, the acceptable nature of materials may change, hence the types of materials collected may change. Three methods for receipt of material are: 1) Materials picked-up at Base work areas, (offices, shops, etc.) if there are sufficient quantities of material generated. 2) Materials may be deposited at the drop-off station at the Recycle Center, Bldg 805. 3) Buy-back of aluminum cans at Recycle Center, Bldg 805 see notes below. Call us if you have questions or suggestions!

Bottles not labeled with the #1 symbol Caps are usually a different type from the bottle - toss if unmarked. Plastic types #3, #4, #5, #6 or #7.	Marketing Office) Bldg 805 Bldg 805 Bldg 805 Bldg 805 AAFES BX	documents (DD 1348-1). When hauling and processing is a problem, call 777-9007 for assistance. Cans may be collected by RRRP, deposited in a drop-off bin, or sold for cash for personal or unit funds at the Recycle Center. You need not crush cans – keep them clean and dry. We pay more for over 50 and over 100 lbs. Please rinse clean and remove labels. Cut out top & bottom and flatten. Metals can be recycled again and again. Polyethylene Terephthalate (PETE). Rinse clean, remove lids, and crush. Look for the arrows and the 1 on the bottom of the container. Some clear plastic bottles are made of other materials so look at the stamp carefully. High Density Polyethylene (HDPE) is used to make many plastic items. For recycling, please take care to place the items in the correct bin. Even a small amount of the wrong type of plastic can ruin a melt. Often plastic collected for recycling is actually landfilled or wasted because of comingling and contamination. Think twice! Many grocery stores take bags back. Not all plastics are locally recyclable. These we don't accept as they are not locally marketable at present.
window frames, pots, etc. Aluminum Cans: Clean liquid free beverage cans only Tin Cans: Rinsed clean and flattened, food & beverage cans only. Plastics: #1 PETE	is processed differently than cans and is not accepted by our markets yet. Caps, lids, stoppers, and foil.
